

NATIONAL LEAGUE  
OF TRANSPORT BUSINESS

**CONCEPT OF THE PILOT PROJECT  
OF THE ELECTRONIC PLATFORM  
OF PUBLIC CONSULTATIONS**

## MISSION OF e-PLATFORM

The state information system operates on the principles of planned economy, when the whole market is divided into sectors of the national economy, from which information is sent to the statistical authorities in a centralized manner, and then in ministries for decision making.

After the transition to a market economy, this information has become with commercial confidentiality.

The government is forced to formulate sectoral policies in acute shortages actual data.

### e-Platform solves this problem!

is activated by the directorates of ministries in preparation evidence base

collects actual data online for preparation of quality industry solutions

provides collation of analytical data into a single controversial one report

# LEGAL PRINCIPLES OF IMPLEMENTATION OF e-PLATFORM

The need for e-Platform implementation basically at the reform of the national command-and-control system of public administration in accordance with the European model and is realized in three strategic directions:

**National Strategy for Civil Society Development in Ukraine for 2016-2020 years**, provides for a broad public debate through public consultation with the public

**Public Administration Reform Strategy of Ukraine for 2016-2020 years**, provides the development of a new method of forming and coordinating public policy in an inclusive manner by professionally Experts discuss the business environment

**Strategy of information society development in Ukraine**, provides for the participation of citizens and organizations in shaping and implementing public policy through the introduction of e-democracy pilot projects

# CONFORMITY OF e-PLATFORM TO INTERNATIONAL STANDARDS

## In 2013

2013 G8 countries have adopted an Open Data Charter

## In 2016

Ukraine has joined the Charter of Open Data, demonstrating its commitment to international standards in the field of open data. The Government of Ukraine was one of the first to launch the Open Government Initiative

## From 2017

2017 The National Transport Business League works as part of the Implementation WG of the International Open Data Charter as an expert organization

## In 2018

League conducted joint work with international experts on open data Charter Guidance on cross-sectoral data exchange and e-Platform Concept

## PRINCIPLES OF e-PLATFORM

The e-Platform provides opportunities for innovative evidence-based policy decisions and support for economic benefits and social development for all members of society and is based on the following principles:

- ✓ Lawfulness - construction of processing within the limits of the current legislation of Ukraine
- ✓ Constructive - organization of work on a branch basis
- ✓ Inclusiveness - an open access for all, without exception, subjects of the civil and business environment
- ✓ Independence - the lack of influence of power political and administrative centers, financial industrial and other groups
- ✓ Transparency is a documentary representation of all processes, including online broadcasting of public events
- ✓ Electronic format - introduction of both broad public discussion, and expert-expert discussion in the business environment

# e-PLATFORM TOOLS

In its work e-Platform uses the tools of the current Ukrainian legislation:

suggestions (analytical data)

public opinion (comments, expert publications, reports of institutes)

online broadcast and archive of public events

online broadcast and archives of Internet conferencing records

consolidated discussion report

## EXPECTED RESULTS

- ✓ Increasing the level of public trust in the Government
- ✓ Providing directories with factual data
- ✓ Implementation of the inclusive method of formation of sectoral policy
- ✓ Reduction of corruption risks in central executive authorities
- ✓ Strengthening the international reputation of Ukraine as a European democratic state
